Concrete As Art

Bomanite Imprint Systems, the original cast-in-place architectural concrete for more than five decades, is still the finest custom paving and flooring product in its class. But it is far more than just imprinted concrete. Far more than an innovative process. It is an expression of lifestyle. Of imagination. Of art.

Bomanite Imprint Systems integrate both personality and product, crafting solutions to bring your ideas to life...rather than forcing your ideas to conform to a limited product line.

What Makes Us Different?

Our systems begin with people. From the property owners and designers who possess the vision, to the trained technicians who manufacture the tools and materials, to the licensed craftsmen who perform the installations...Bomanite Imprint Systems are driven as much by quality people as by our quality product.

All Bomanite Imprint Franchise Partners receive the most extensive technical education program in the industry. And it shows in every installation a reflection of the long-standing Bomanite tradition of innovation, service and expertise.

Beyond The Back Yard

If you think imprinted concrete is just for residential applications like pool decks, patios, walkways and entries...think again. Rugged, long-lasting Bomanite Imprint Systems are also ideal for commercial and municipal applications. Not only do our Imprint Systems hold up under heavy traffic, they can add extraordinary beauty to an ordinary public thoroughfare.

Bomanite Imprint Systems offer two unique styles of cast-in-place architectural concrete. Choose from Bomanite or Bomacron, both used in a wide variety of applications to upgrade plain concrete or asphalt, or alternatively reduce the cost of installing natural materials such as slate or granite.

Bomanite, the pioneer imprinting technique, provides a smooth surface between the joint lines creating sleek patterns that simulate most tiles, new brick and certain stone materials.

Bomacron, the textured version of the original, provides the added dimension of texture and relief between the joint lines.

Bomacron patterns simulate a wide variety of natural materials including slate, granite, limestone, sandstone and wood.

*Your Only Limit:
Your Own Imagination*

Bomanite Imprint Systems offer more choices and design flexibility

than ever before. More than 200 standard patterns and an infinite variety of custom tooling options provide the creative freedom you need to make your next project unique. The monolithic, reinforced design and color-hardened surface of our Imprint Systems provide the structural integrity and surface strength for unsurpassed quality, long-term durability and proven performance. Imagine the possibilities with limitless color, texture and pattern combinations. If you can dream it, you can do it with Bomanite. Contact your local Bomanite Imprint Franchise Partner today!
